Profile

DevOps Engineer with 6+ years of IT experience in DevOps, Cloud Engineering, and System Administration. Experienced in designing and managing AWS infrastructure using Terraform, automating CI/CD pipelines with Jenkins, and deploying containerized applications using Docker and Kubernetes. Skilled in Linux administration, infrastructure automation, production support, incident management, and troubleshooting. Proficient with monitoring and observability tools including Prometheus, Grafana, and AWS CloudWatch. Strong collaborator with experience delivering secure, scalable, and highly available application environments through automation and DevOps best practices.

Technical Skills

Cloud Platforms: AWS (EC2, S3, VPC, IAM, RDS, Lambda, ECR, EKS), Azure, GCP

Containers & Orchestration: Docker, Kubernetes

CI/CD & Automation: Jenkins, Terraform, Ansible, Git, GitHub

DevSecOps & Webservers: Maven, SonarQube, Trivy, Tomcat, Nginx

System Administration: Patch Management, Infrastructure Support, Troubleshooting

Operating Systems & Databases: Linux (RHEL/Ubuntu), Windows Server, MySQL

Scripting & Monitoring: Bash, Python, CloudWatch, Prometheus, Grafana

DevOps Practices: Release Management, Production Support, Disaster Recovery, Hotfixes

ITSM Tools: Jira, BMC Remedy, BMC Helix

Professional Experience

Unisys India Pvt. Ltd. | Enterprise Analyst / DevOps Engineer **Jul 2023 – Present**

- Designed, provisioned, and managed AWS infrastructure using Terraform, including VPC, EC2, IAM, S3, Route 53, and networking components to support scalable and highly available environments.
- Built and optimized CI/CD pipelines using Jenkins, Git, Maven, SonarQube, Docker, and Trivy to automate application build, security scanning, testing, and deployment processes.
- Deployed and managed containerized applications on Kubernetes, performing rolling updates, node maintenance, patching, and cluster troubleshooting to ensure high availability.
- Automated infrastructure provisioning and configuration management using Terraform and Ansible, improving deployment consistency and reducing manual effort.
- Implemented monitoring and observability solutions using Prometheus, Grafana, AWS CloudWatch, and CloudTrail to proactively identify performance issues and improve system reliability.
- Provided production support by resolving deployment failures, troubleshooting infrastructure issues, performing root cause analysis (RCA), and supporting incident and change management activities.
- Developed and supported serverless workloads using AWS Lambda and DynamoDB, integrating cloud-native services into enterprise applications.
- Collaborated with development, QA, security, and operations teams to streamline release processes, improve deployment reliability, and deliver secure, scalable application environments.

Project Experiences

T-Mobile | Telecommunications — DevOps Engineer | **Feb 2024 – Present**

- Built CI/CD pipelines using Jenkins, Git, and Maven; managed Docker containers, Kubernetes clusters, and Jenkins master-slave architecture for scalable application deployments.
- Developed AWS cloud solutions using Lambda, SNS, S3, and CloudWatch for serverless automation, monitoring, storage optimization, and production support.

OTIS | Manufacturing — DevOps Engineer | **July 2023 – Feb 2024**

- Automated CI/CD pipelines and Azure infrastructure using Terraform, AKS, Helm, and PowerShell; implemented blue-green deployments, auto-scaling, and Azure Key Vault integration.
- Improved production reliability through Grafana, Azure Monitor, Log Analytics, RCA, incident management, and collaboration with development and QA teams.

Server Engineer/Systems Engineer at Taggd (PeopleStrong), Gurgaon **Feb 2023 – May 2023**

SysOps Engineer/Systems Administrator at Team Lease Services Ltd, Gurgaon **Nov 2020 – Feb 2022**

System Administrator/Systems Engineer at Enhance Business Solutions, Gurgaon **Dec 2019 – May 2020**

System Administrator at MSR IT Ltd, Gurgaon **Oct 2018 – May 2019**

Education

BCA, Jaipur National University

2015 – 2018
